

Dopakit

Quick Start Guide

Version 1.0 — August 2026

Welcome

You just bought a Notion system built for how your brain actually works. No rigid schedules. No shame. Just templates and guides designed around dopamine, not discipline.

This guide walks you through setting everything up. Budget 30 minutes. Do it once. Then get back to work.

Before you start: Open Notion in a browser tab. Have your Google account ready. Grab coffee. This is the last productivity setup you'll ever do.

What you got

File	What it is	Time to set up
notion-template-structure.md	Step-by-step instructions for building your workspace	20 min
body-doubling-guide.md	Complete guide to virtual coworking and accountability	Read in 10 min
printable-planner.md	7-page planner you can print or use digitally	Print and go
dopakit-money-tracker.xlsx	Google Sheets template with 5 tabs, formulas, and charts	5 min
quick-start-guide.html	This document	—

Setup in 4 steps

STEP 1 OF 4

Set up the Money Tracker

Open `dopakit-money-tracker.xlsx` in Google Sheets (File → Import). Rename it "Dopakit Money". Bookmark it. This takes 5 minutes and you'll use it every month.

STEP 2 OF 4

Build your Notion workspace

Open `notion-template-structure.md`. Follow it section by section. Create the pages and databases exactly as described. Don't skip. Don't customize yet. Just build the skeleton.

STEP 3 OF 4

Personalize it

Now make it yours. Add your real clients to the Client Project database. Fill in your energy peak. Set up your first body doubling session. Add 3 tasks to today's dashboard. This is where it becomes YOUR system.

STEP 4 OF 4

Read the Body Doubling Guide

Open `body-doubling-guide.md`. Read it once. Schedule your first session this week. Even one session makes a difference.

Your first week

Here is exactly what to do each day. Follow this. Don't improvise. Trust the system for one week.

Day	Action
-----	--------

Day 1	Complete the 4-step setup above. Add 3 tasks to today's dashboard. Do them. Check them off.
Day 2	Use the dashboard. Add your tasks in the morning. Do a focus sprint (25 min work + 5 min break). Earn one reward from your dopamine menu.
Day 3	Try the task breakdown template. Pick one complex task. Break it into 6 small steps. Do step 1.
Day 4	Schedule a body doubling session for next week. Read the guide section on finding partners. Send one invite.
Day 5	Open the Money Tracker. Log this week's income. Check your tax set-aside amount. Relax — the system is working.
Day 6	Use the Content System. Pick one idea from your parking lot. Write a messy first draft. Don't edit. Just write.
Day 7	Sunday reset ritual. Answer the 4 weekly planner questions. Review your "did the thing" log. Celebrate what got done.

Bad brain day? Open the Reset Protocols. Follow the Bad Brain Day procedure. Some days your brain won't cooperate. That's fine. The system has a plan for that too.

Common questions

I missed a day. Should I start over?

No. Pick up where you left off. The system is flexible. It was built for brains that don't do linear.

I don't like one of the modules. Can I skip it?

Yes. The modules work independently. Skip what doesn't fit. Use what helps.

I need help.
